

# MOHIT RAJ

mohitraj2180@gmail.com | +91-6200206306 | linkedin.com/in/mohit-raj- | github.com/mohraj2180

## PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (2026) with hands-on experience building backend services in Java and Spring Boot, including a microservices-based application with JWT authentication, service discovery, API Gateway, and containerized deployment. Comfortable across the development lifecycle — design, coding, unit testing, debugging, and deployment — with working knowledge of RESTful APIs, ORM/Hibernate, SQL databases. Strong attention to detail, effective communicator, and quick to pick up new tools and standards within a team environment.

## TECHNICAL SKILLS

**Programming Languages:** Java, SQL, JavaScript, C++

**Backend & Frameworks:** Spring Boot, Spring Security, Microservices Architecture, RESTful APIs, JPA/Hibernate

**Databases:** MySQL

**Architecture & Messaging:** Eureka Service Discovery, API Gateway, RabbitMQ

**Testing & Quality:** JUnit, Mockito, Swagger

**Tools & DevOps:** GitHub, Docker, VS Code, Microsoft Office

**Core Competencies:** Problem-Solving, Attention to Detail, Time Management, Communication, Team Collaboration

## PROJECTS

### FinFlow — Loan Management System

Dec 2025 – Mar 2026

*Angular, Spring Boot, Microservices, Spring Security, JWT, MySQL, RabbitMQ, Docker, Eureka, API Gateway*

- Developed a microservices-based loan management application with an Angular frontend and Spring Boot backend, covering loan applications, authentication, documents, and admin operations.
- Implemented JWT-based authentication and role-based access control with Spring Security, and built RESTful APIs across Auth, Application, Document, and Admin services.
- Used Eureka Service Discovery and an API Gateway to coordinate microservices, and RabbitMQ for asynchronous inter-service communication.
- Applied JPA/Hibernate for data persistence, containerized services with Docker, and used JUnit, Mockito, Swagger, API documentation, and code quality.

### E-Commerce Platform

Apr – May 2025

*HTML, CSS, JavaScript, React.js, Postman*

- Built a feature-rich e-commerce application with secure login, shopping cart functionality, and end-to-end order processing.
- Engineered a dynamic admin dashboard with role-based access control for real-time management of product, user, transaction, and order-status data.
- Designed and executed a system test plan across 100+ simulated users, using Postman for API verification and Selenium for automated UI testing.

### Real-Time Chat Application

Jan – Mar 2025

*MERN Stack, Socket.IO*

- Developed a real-time chat application using the MERN stack and Socket.IO, with MongoDB-backed user authentication and JWT-secured login.
- Built RESTful APIs with Express for backend services and implemented state management with Zustand.

## RELEVANT TRAINING

### GFG (Edtech Company) — Data Structures & Algorithms Training

Jun – Jul 2024

- Completed a Data Structures and Algorithms curriculum covering arrays, linked lists, stacks, queues, trees, and graphs, and built proficiency in dynamic programming, graph algorithms, and complexity analysis.

## CERTIFICATIONS

- Building Web Applications in PHP — Coursera, Dec 2024
- HTML, CSS, and JavaScript for Web Developers — Coursera, May 2024
- Mastering Data Structures and Algorithms using C and C++ — Udemy, Feb 2024
- Learn C++ Programming – Beginner to Advance: Deep Dive in C++ — Udemy, Aug 2023
- Build Responsive Real-World Websites with HTML and CSS — Udemy, Dec 2023

## EDUCATION

**Lovely Professional University, Phagwara, Punjab**

2022 – 2026

*Bachelor of Technology, Computer Science and Engineering*

**DAV Centenary Public School, Siwan, Bihar — Senior Secondary**

2020 – 2021

**Kendriya Vidyalaya, Siwan, Bihar — Matriculation**

2018 – 2019
